Trishna Paswan

Software Engineer

GitHub
LinkedIn
LeetCode

Passionate about developing intelligent and user-centric applications, with proficiency in Python, Java, and C++. Skilled in web technologies like HTML, CSS, and Tailwind CSS. Skilled in building web applications using Flask and creating clean, responsive UIs. Eager to solve real-world challenges through technology and continuous learning in a dynamic environment.

EDUCATION

Bennett University

Bachelor of Technology in Computer Science & Engineering

July 2024 — Present

Greater Noida, UP

DAV Public School

Senior Secondary — 83%

April 2022 — April 2024

Asansol, West Bengal

SKILLS

Programming Languages	Java, Python, C++, HTML, CSS
Tools & Platforms	Git, GitHub, Antigravity, Render, Vercel, Playwright
Frameworks & Libraries	Machine Learning, NLP, Flask, Tailwind CSS, spaCy, scikit-learn, REST APIs.

PROJECTS

CodeArena | Flask, Tailwind CSS, Playwright, REST APIs

April 2026

- Developed a full-stack coding platform enabling real-time code execution, submission, and evaluation.
- Built scalable backend services using **Flask** and **REST APIs** for authentication, problem management, and submission workflows.
- Implemented automated test-case validation for accurate code evaluation, simulating competitive coding platforms.
- Designed a responsive UI using **Tailwind CSS** and ensured reliability through **Playwright**-based end-to-end testing.

Mental Health Sentiment Analysis | Python, NLP, Machine Learning

April 2026

- Built an NLP-driven sentiment analysis model to classify mental health states from user-generated text.
- Applied preprocessing, tokenization, and feature engineering techniques to improve model performance.
- Enabled data-driven insights for early detection of emotional patterns using machine learning algorithms.

OmniAI | Python, Flask, Playwright, NLP

Nov 2025

- Built a multi-functional AI platform with modules for Google Form AutoFilling, Resume Analysis, and Plagiarism Detection.
- Developed OneFill using **Playwright**, **Regex**, and fuzzy matching to extract and auto-submit forms.
- Implemented NLP-based resume analysis with ATS scoring and plagiarism detection using semantic similarity.

QR Code Generator | Python, qrcode library

Dec 2024

- A team project to build a **QR code** creation tool for URLs and text data.
- Programmed QR code generation with **customizable** size, border, and error correction levels.
- Exported high-resolution PNG images for easy sharing and scanning.
- Contributed to coding, debugging, and multi-device testing; presented project during assessments.

ACHIEVEMENTS

Managment Head at CodeChef BU :

Contributing to coding events, peer learning, and technical community growth.

August 2024

Smart India Hackathon (SIH):

Collaborated in a team to solve real-world problem statements, focusing on innovative and scalable solutions under strict timelines.

Sep 2025

HackStreet 4.0 – IEEE Student Branch IIIT, Noida:

Participated in a competitive hackathon, built innovative solutions within limited time, and enhanced skills in problem-solving, teamwork, and rapid prototyping.

April 2026
